## **DETAILED ACTION**

### ***Election/Restrictions***

#### ***Species Election***

This application contains claims directed to more than one species of the generic invention. These species either possess divergent structures and/or possess different chemical and physical properties (i.e. Irinotecan vs. 5-FU). Thus, these species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species listed below do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same special technical feature among the different species.

The species are as follows:

Applicant is required to elect:

a) a particular type of cancer. Once applicant has elected a particular type of cancer, applicant is further required to elect whether the composition or method of treatment entails treating a primary or secondary cancer as disclosed in claim 13.

b) a particular type of additional chemotherapeutic agents listed in claims 2-3 and claims 8-9. Specifically, applicant is required to elect a particular type of species

Art Unit: 1609

(i.e. 5-FU alone or leucovorin alone or irinotecan alone or capecitabine alone) or a combination if desired (i.e. 5-FU with leucovorin in combination).

Furthermore, the recitation of claims 6 and 11 suggests that the composition or the process may further entail the addition of agents. In these instances, applicant is required to disclose whether or not additional agents will be added to the composition (as disclosed in claims 6 and 11) and elect a particular type of agent to be added to the composition or process (i.e. adding agents such as antibodies targeted against a cancer cell or adding an anticancer agent targeted against blood vessels or adding an anticancer agent such as antibodies targeting EGF and VEGF).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1609

The following claims 1-11 and 13 are generic.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
